CHROMsuite
Data Analysis Tools for EnviroQuant

GRAPHtools™ 1.0
graphing + calculations

GRAPHTOOLS SIMPLIFIES TIME CONSUMING FINAL REPORT TASKS

GRAPHtools provides rich features to the Excel® graphing modules that analysts and project managers need: live scatter graph labels, histogram template controls, and essential formulas like SIGFIGs and RPD.

FEATURES + BENEFITS

:: **Full documentation**
   Online help completely illustrates how to use each feature.

:: **Advanced Features**
   – Commonly used laboratory formulas – significant figures, percent recovery, relative percent difference, relative standard deviation, method detection limit assessment, response factor calculations (all variations), amounts from responses using all variants of the response factor formulas (linear, quadratic, average, weighted, logarithmic) to name a few.
   – Scatter graph tools – generate and format scatter graphs: group points and apply images, colors, and labels to the groups with ease.
   – Histogram formatting tools – Generate and format histograms: group items and apply images, colors and format labels with ease.

CURRENT VERSION

GRAPHtools 1.0 will be available in late September 2007.

:: **Minimum Requirements**
   – Windows 2000, Windows XP, Windows XP Pro or appropriate platform for Agilent EnviroQuant Software.
   – Microsoft Office® / Excel® 2000, XP, 2003, 2007.

PRICE

$300/per license

ABOUT ABACUS

Founded in 1999, **Abacus Database Applications, Inc.** has been building software enhancements to save time, improve accuracy, and avoid costly rework in data analysis.

GRAPHtools™
graphing + calculations

CHROMsuite bundles four unique + independent components:

DATAtools™
CHROMtools™
CALtools™
GRAPHtools™
